NFAAS | NAVY FAMILY ACCOUNTABILITY and ASSESSMENT SYSTEM

What is NFAAS?

The Navy Family Accountability and Assessment System, also known as NFAAS, is an event-based system used by the Navy following a disaster, or man-made event. It helps the Navy determine the status of Navy Family Members (NFM) (Active Duty, Reserves, Department of the Navy Civilians, NAF/NEX employees, and their immediate family members). NFAAS can be accessed via three different sources: a personal computer website, a mobile website or the NFAAS app. Per NAVADMIN personnel are required to update NFAAS twice a year and/or when any personal information changes. If you are getting ready to PCS, be sure to update your information as soon as you are able. This helps the Navy know if any NFMs are in an area that has been declared a disaster and if so, to account for their safety and provide recovery assistance.

What does NFAAS do?

Muster: Personnel Accountability	Ask for Assistance: Needs Assessments	Tracking Individual Augmentees:
♦ NFAAS allows commanding officers and supervisors to accurately account for all assigned personnel and their family members. ♦ NFAAS allows personnel to report their current location, displaced location, update emergency personal contact information, and to request assistance.	♦ Following an event Navy Personnel and Family members requiring assistance have the option to fill out and complete a Needs Assessment. ♦ The Navy uses NFAAS to determine needed resources and to facilitate recovery for those personnel affected by a natural disaster or man-made event. ♦ A Fleet and Family Support Center representative will contact the affected Navy personnel and their families to determine the appropriate response or assistance needed for recovery.	♦ An "IA File" is automatically created in NFAAS when a Service Member is going to be, or is already, deployed as an Individual Augmentee (IA). ♦ The purpose for the IA file being created is so that an Individual Deployment Support Specialist (IDSS) can contact the family of the IA to help with any area that the Navy can provide assistance. ♦ A Command IA Coordinator (CIAC) will contact the Sailor every month and the family at intervals selected by the member in NFAAS.

How do I access NFAAS?

Normally NFAAS requires access to a working computer that is connected to the Internet. During a disaster, however, personnel may be displaced from their home and office, and may not have a portable computer with Internet capability. The following are alternative ways to access NFAAS:

♦ *Mobile Website:* The mobile website is a minimized version of NFAAS, making the system much easier to view and navigate while using a handheld mobile device.

♦ *NFFAS App:* FREE Disaster readiness based App for Sailors and their families.

⇒ Easy to navigate

⇒ PRE, DURING and POST disaster resource information.

⇒ Users can create custom emergency kits and plans based on criteria such as location and family members (children, pets).

⇒ FFSC locator for CONUS and OCONUS to show the nearest Military Family Service Center based on the person's location with turn by turn directions.

⇒ RSS Feeds with most current weather for local and regional area.

⇒ Built in weather alert. Similar to a weather alert radio or the EBS alert that shows up on a television, this function automatically initiates a visual and audio alert to smart phones based on the users' location.

⇒ Ability to save important information on medical needs and insurance.

⇒ Resource pages with direct links to FEMA, ARC, etc.

⇒ Survey feedback mechanism.
