

Basic Digital Photography with Ron Steiner

Basic Digital Photography

Minimum / Maximum Enrollment: 4-16

This is a 4-session 8-hour class on basic photographic concepts and principals. This class is geared towards those who use DSLR cameras with interchangeable lenses. The focus of the class will be to help you better understand how to use your photographic equipment, and the terms used in conjunction with digital photography, composition, and lighting. My part in this collaboration is to demystify your digital camera, provide examples of when and how to make camera adjustments in order to achieve the results you want. At the end of the day when you leave this class, I want you to have the confidence to pick up your camera and take better photographs. Students will be given weekly assignments reviewing the principals of camera techniques which we will review in class. The best way to understand your camera is to make a lot of images and critique them!
