01/21/2016		Nissan North America Inc.	Manufacturer Safety recall issued - NHTSA #16V-029 - Recall #PC426 - ALTIMA HOOD LATCH NTB16-011 - Status: Remedy Available Locate an authorized Nissan dealer near you to obtain more information about this recall - Learn more about this recall
------------	--	---------------------------	--

Description: On some of the affected vehicles, the secondary hood latch may not function properly.

If the primary hood latch is released, the secondary hood latch may not hold the hood closed as designed while the vehicle is in motion. In certain circumstances, this may cause the hood to open while driving and partially obscure the driver's vision, increasing the risk of a crash.

Remedy: Your Nissan dealer will replace the hood latch assembly. This repair should take less than an hour to complete and will be offered at no charge for parts and labor. Your dealer may require your vehicle for a longer period of time based upon their work schedule.

02/04/2016	64,951	Precision Tune Auto Care Baltimore, MD 410-391-5300 precisiontune.com ★ 4.8 / 5.0 29 Verified Reviews ✓ ♥ 214 Customer Favorites	 Vehicle serviced - Tire(s) replaced

Structural damage may impact vehicle safety and reliability. Get the unibody or frame of the vehicle inspected by a professional.

04/14/2016	65,026	Virginia Inspection Station	Failed safety inspection
------------	--------	--------------------------------	--------------------------

04/15/2016		Virginia Inspection Station	Passed safety inspection
------------	--	--------------------------------	--------------------------

05/23/2016		Nissan North America Inc.	Manufacturer Safety recall issued - NHTSA #16V-244 - Recall #R1609 - MAX ALT RG MUR OCS NTB16-052 - Status: Remedy Available Locate an authorized Nissan dealer near you to obtain more information about this recall - Learn more about this recall
------------	--	---------------------------	---

Description: The Occupant Classification System (OCS) is designed to classify the size and weight of the front seat passenger and, under certain conditions, automatically turn OFF the passenger air bag. The OCS system is designed to only deploy the front passenger airbag when the front passenger seat is occupied by an adult. In the affected vehicles, the OCS software may incorrectly classify the passenger seat as empty when it is occupied by an adult. If the OCS does not detect an adult occupant in the passenger seat, the passenger airbag would be deactivated.

Failure of the passenger airbag to deploy during a crash (where deployment is warranted) could increase the risk of injury to the passenger.

Remedy: The OCS software will be reprogrammed to the potential for adjusting the seat as empty. This reprogram will be offered at no charge to the customer and should take less than an hour to complete. Your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

Owner 4 Personal Vehicle
Purchased: 2016

Date	Mileage	Source	Comments
08/09/2016		Virginia Motor Vehicle Dept.	Vehicle purchase reported
08/22/2016		Virginia Motor Vehicle Dept. Norfolk, VA	Title issued or updated - New owner reported - Loan or lien reported

Avoid financial headaches. Make sure the loan has been paid off if you're buying from a private seller. [Learn More](#)

12/08/2016		Nissan North America Inc.	Manufacturer Service Campaign issued - Campaign #PC490 - ALT RGE CVT P0776 NTB16-121 - Status: Remedy Available Locate an authorized Nissan dealer near you to obtain more information about this campaign - Learn more about this campaign
------------	--	---------------------------	---

Description: Under specific driving conditions, hydraulic pressure may decrease and result in belt slip within the CVT. This may result in MIL illumination. Continuing to drive the vehicle in this condition can lead to accelerated wear and damage to the CVT. Nissan is proactively reprogramming the Transmission Control Module (TCM) with updated CVT software to prevent decreased hydraulic pressure and belt slip from occurring. This is not a safety issue, and the vehicle still meets and/or exceeds all applicable safety standards.

Failure to have this reprogramming performed in a timely manner could result in future damage to your vehicle's transmission. If repair or replacement of the transmission becomes necessary outside of the powertrain warranty period, the resulting repair costs will be at the owner's expense.

Remedy: To assure your continued satisfaction and confidence in your vehicle, and prevent possible future damage to the CVT, your Nissan dealer will reprogram the Transmission Control Module (TCM) at no charge to you for parts or labor. The service should take less than one (1) hour to complete, but your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

10/24/2019		Nissan North America Inc.	Manufacturer Service Campaign issued - Campaign #P9324 - ALTIMA LOWER LINK NTB19-082 - Status: Remedy Available Locate an authorized Nissan dealer near you to obtain more information about this campaign - Learn more about this campaign
------------	--	---------------------------	---

Description: On some affected vehicles, one of the rear lower suspension links may corrode and separate at the bushing joint area when operated in areas with high road salt usage.

Customers may notice a knocking or rattling noise from the rear of the vehicle or observe wheel misalignment on the rear wheel(s) if the link separates. The vehicle can be brought to a safe stop in this condition.

Remedy: Dealers will replace rear lower link(s) with new parts and perform a four-wheel alignment.

06/23/2021		Nissan North America Inc.	Manufacturer Safety recall issued - NHTSA #20V-315 - Recall #R21A6 - ALTIMA HOOD LATCH NTB21-055 - Status: Remedy Available Locate an authorized Nissan dealer near you to obtain more information about this recall - Learn more about this recall
------------	--	---------------------------	--

Description: If a vehicle is driven with the primary hood latch disengaged, (and the hood partially opened), the secondary hood latch may

become contaminated with dirt or corrosion. If the secondary hood latch is not properly inspected and maintained, such dirt or corrosion could then prevent the secondary hood latch from engaging properly.

If your vehicle is driven with the primary hood latch disengaged (and the hood partially opened), the secondary hood latch on your vehicle may become contaminated with dirt or corrosion. Such dirt or corrosion could then prevent the secondary hood latch from engaging properly. If the primary hood latch is later inadvertently released (such as when refueling the vehicle) and the secondary hood latch, after having been opened, remains stuck in the open position, the hood may open without warning while driving and could obscure the driver's vision, increasing the risk of a crash.

Remedy: A remedy is now available. Dealers will inspect the latch for proper operation, and clean and lube as needed, or replace the secondary latch if it is not fully functional, at no cost to the owner. In addition, dealers will now install a new hood release lever spring and affix an under-hood latch-maintenance warning label to any vehicles affected by this voluntary safety recall campaign. An Owner's Manual addendum card with instructions on how to lubricate and maintain the secondary hood latch will also be mailed together with the customer notification. The repair should take less than one (1) hour to complete. The dealer may require the vehicle for a longer period of time based upon the dealer's work schedule.

Glossary

Auction Disclosures or Announcements

Dealers and institutions (i.e. fleet companies, rental car companies, and manufacturers) sell millions of cars at auction each year. Sellers often provide disclosures about a vehicle's damage, mileage, or repair history. These disclosures are made available to potential buyers in pre-sale lists and in auction announcements.

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Lease

When someone leases a car from a dealer, the dealer actually sells the vehicle to a leasing company. The leasing company then collects payments for the vehicle from the new owner for 24, 36, 48 or more months. A leasing company can be an independent car dealer or a car manufacturer.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

New Owner Reported

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Repossession

When a repossession occurs a vehicle owner fails to make loan payments, and the financial institution holding the title takes possession of the vehicle.

Structural Damage

When the main structure or any component designed to provide structural integrity of the vehicle is damaged. All levels of accidents, from minor to severe, can cause structural damage to a vehicle (i.e., damage to the frame or unibody). Having a structural inspection before purchase is recommended.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
